# INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF AFGHANISTAN INTERNATIONAL BANK

#### Opinion

We have audited the accompanying financial statements of Afghanistan International Bank (the Bank), which comprise the statement of financial position as at 31 December 2018, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Bank as at 31 December 2018, and its financial performance and its cash flows for the year then ended in accordance with the accounting framework as stated in note 2 to the financial statements.

## **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the ethical requirements that are relevant to our audit of the financial statements in Afghanistan, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting framework as stated in note 2 to the financial statements and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether
  due to fraud or error, design and perform audit procedures responsive to those risks, and
  obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The
  risk of not detecting a material misstatement resulting from fraud is higher than for one
  resulting from error, as fraud may involve collusion, forgery, intentional omissions,
  misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of
  accounting and, based on the audit evidence obtained, whether a material uncertainty exists
  related to events or conditions that may cast significant doubt on the Bank's ability to
  continue as a going concern. If we conclude that a material uncertainty exists, we are
  required to draw attention in our auditor's report to the related disclosures in the financial
  statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are
  based on the audit evidence obtained up to the date of our auditor's report. However, future
  events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Chief Executive Officer

#### AFGHANISTAN INTERNATIONAL BANK NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

## 1. Status and nature of business

Afghanistan International Bank (the Bank) was registered with Afghan Investment Support Agency (AISA) on 27 December 2003 and received formal commercial banking license on 22 March 2004 from Da Afghanistan Bank (DAB), the central bank of Afghanistan, to operate nationwide. The Bank obtained Islamic banking license from DAB via letter no. 1863/1890 dated 21 July 2014.

The Bank initially was incorporated as a limited liability company and domiciled in Afghanistan, however, on the basis that the bank capital is divided into shares the status of the bank is changed from limited liability to Corporation under the Corporations and Limited Liability Companies Law, this status is effective from 04 May 2016. The principal business place of the Bank is at AIB Head Office, Airport Road, Kabul, Afghanistan.

The Bank has been operating as one of the leading commercial banking service provider in Afghanistan. The Bank has 37 branches and 2 cash outlets (2017: 37 branches and 4 cash outlets) in operation.

#### 2. Basis of preparation and measurement

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standard Board, the Law of Banking in Afghanistan and other laws and regulations issued by Da Afghanistan Bank. Whenever the requirement of the Law of Banking in Afghanistan differs with the requirements of the IFRS, the requirement of the Law of Banking in Afghanistan and other laws and regulations issued by Da Afghanistan Bank takes precedence.

These financial statements have been prepared under the historical cost convention except that certain investments, derivative financial instruments and forward foreign exchange contracts are stated at fair value.

These financial statements comprise statement of financial position, statement of comprehensive income as a single statement, statement of changes in equity, statement of cash flows and the accompanying notes.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Bank's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.

2.1 The Bank has adopted the following accounting standards and the amendments and interpretation of IFRSs which became effective for the current year:

#### Standard or Interpretation

- IFRS 2 Share-based Payments Classification and Measurement of Share-based Payments Transactions (Amendments)
- IFRS 4 Insurance Contracts: Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts (Amendments)
- IFRS 9 Financial Instruments: Classification and Measurement
- IFRS 15 Revenue from Contracts with Customers
- IFRIC Interpretation 22 Foreign Currency Transactions and Advance Consideration

ben

## Improvements to Accounting Standards Issued by the IASB in December 2016

- IAS 28 - Investments in Associates and Joint Ventures: Clarification that measuring investees at fair value through profit or loss is an investment-by-investment choice

The adoption of the above amendments, improvements to accounting standards and interpretations did not have any effect on the financial statements except IFRS 9 as disclosed in note 3.1 to the financial statements.

# 2.2 Standards, interpretations and amendments to published approved accounting standards that are not yet effective

The following standards, amendments and interpretations with respect to the approved accounting standards would be effective from the dates mentioned there against:

| Effective date<br>(annual periods<br>beginning) |
|---|
| January 01, 2020                                |
| January 01, 2019                                |
|   |
| Not yet finalized                               |
| January 01,2019                                 |
| January 01,2021                                 |
| January 01,2019                                 |
| January 01,2020                                 |
| January 01,2019                                 |
| January 01,2019                                 |
|   |

The above standards, amendments and interpretations are not expected to have any material impact on the Bank's financial statements in the period of initial application except IFRS 16 for which the Bank is in the process of estimating the impact on its financial statements.

In addition to the above standards and amendments, improvements to various accounting standards have also been issued by the IASB in December 2017. Such improvements are generally effective for accounting periods beginning on or after 01 January 2019. The Bank expects that such improvements to the standards will not have any impact on the Bank's financial statements in the period of initial application.

#### 3. Summary of significant accounting policies

EL

The accounting policies adopted in preparation of this financial statements are consistent with those followed in the preparation of the annual financial statements of the Bank for the year ended 31 December 2017 other than as disclosed in note 3.1 below:

#### 3.1 Adoption of IFRS 9 Financial Instruments

In these financial statements, the Bank has applied IFRS 9 and IFRS 7R, effective for annual periods beginning on or after 01 January 2018, for the first time.

## 3.1.1 IFRS 9 Financial Instruments

IFRS 9 replaces IAS 39 for annual periods on or after 01 January 2018 upon adoption of IFRS 9 Bank has not restated comparative information for 2017 for financial instruments in the scope of IFRS 9. Therefore, the comparative information for 2017 is reported under IAS 39 and is not comparable to the information presented for 2018. Differences of AFN 8,110 thousands arising from the adoption of IFRS 9 have been recognized directly in retained earnings as of 01 January 2018.

|   | AFN '000' |
|---|-----------|
| Retained earnings                               |           |
| Closing balance under IAS 39 (31 December 2017) | 2,145,383 |
| Recognition of IFRS 9 ECLs (note 9.5)           | (8,110)   |
| Opening balance under IFRS 9 (01 January 2018)  | 2,137,273 |

#### 3.1.1.1 Changes to classification and measurement

To determine their classification and measurement category, IFRS 9 requires all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics.

The IAS 39 measurement categories of financial assets (fair value through profit or loss (FVPL), available for sale (AFS), held-to-maturity and amortized cost) have been replaced by:

- Debt instruments at amortized cost
- Debt instruments at fair value through other comprehensive income (FVOCI), with gains or losses recycled to profit or loss on de recognition
- Equity instruments at FVOCI, with no recycling of gains or losses o profit or loss on de recognition
- Financial assets FVPL

The accounting for financial liabilities remains largely the same as it was under IAS 39, except for the treatment of gains or losses arising from an entity's own credit risk relating to liabilities designated at FVPL. Such movements are presented in OCI with no subsequent reclassification to the income statement.

The Bank's classification of its financial assets and liabilities is explained in notes 3.3.1.4 and 3.3.2.

Under IFRS 9, the classification is based on two criteria: the Bank's business model for managing the assets; and whether the instruments' contractual cash flows represent 'solely payments of principal and interest' on the principal amount outstanding (the 'SPPI criterion'). The new classification and measurement of the Bank's debt financial assets is "Debt instruments at amortized cost" for financial assets that are held within a business model with the objective to hold the financial assets in order to collect contractual cash flows that meet the SPPI criterion.

6-

The assessment of the Bank's business models was made as of the date of initial application, 01 January 2018, and then applied retrospectively to those financial assets that were not derecognized before 01 January 2018. The assessment of whether contractual cash flows on debt instruments are solely comprised of principal and interest was made based on the facts and circumstances as at the initial recognition of the assets.

As of 01 January 2018, the Bank did not have any debt instruments that did not meet the SPPI criterion within its available-for-sale and held-to-maturity portfolio. As a result of business modal assessment the Bank concluded that the debt instruments currently classified as HTM are held within the business model of collecting cash flows and not selling such instruments, therefore, it elected to classify all of these instruments as debt instruments measured at amortized cost. For AFS debt instruments, the Bank concluded that these are held within the business model of collecting cash flows from holding and selling such instruments for liquidity purpose and to obtain benefit from favorable market price, therefore, these are classified as debt instruments measured at fair value through OCI.

The Bank did not voluntarily designate any loans previously measured at amortized cost as financial assets measured at FVPL. Loan and advances to customers that were classified as Loans and Receivables and measured at amortized cost under IAS 39 are also measured at amortized cost under IFRS 9.

## 3.1.1.2 Changes to the impairment calculation

The adoption of IFRS 9 has fundamentally changed the Bank's accounting for loan loss impairments by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. IFRS 9 requires the Bank to record an allowance for ECLs for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts. The allowance is based on the ECLs associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination. If the financial asset meets the definition of purchased or originated credit impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

Details of the Bank's impairment method are disclosed in Note 3.3.4. The quantitative impact of applying IFRS 9 as at 01 January 2018 is disclosed in Note 3.1.3.

#### 3.1.2 IFRS 7R

To reflect the differences between IFRS 9, IAS 39 and IFRS 7 Financial Instruments:

Disclosures were updated and the Bank has adopted it, together with IFRS 9, for the year beginning 01 January 2018. Changes include transition disclosures as shown in Note 3.1.3 below, detailed qualitative and quantitative information about the ECL calculations such as the assumptions and inputs used are set out in Note 30.2.2.

3.1.3 A reconciliation between the carrying amount under local regulations to the balances reported under IFRS 9 as of 01 January 2018 is as follows:

bu

|  | Local regulation                                 |                  | Re-<br>measurement                   | IFRS 9           |  |

|  |  | PE               | 8,110                                | _                |  |

#### 3.2 Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents comprise balances with less than three months maturity including cash in hand and at ATM, unrestricted balances with the DAB, balances with banks and placements.

#### 3.3 Financial instruments

#### 3.3.1 Financial instruments - initial recognition

#### 3.3.1.1 Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognized on the trade date, i.e., the date that the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognized when funds are transferred to the customers' accounts. The Bank recognize balances due to customers when funds are transferred to the Bank.

#### 3.3.1.2 Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at FVPL, transaction costs are added to, or subtracted from, this amount. Trade receivables are measured at the transaction price. When the fair value of financial instruments at initial recognition differs from the transaction price, the Bank accounts for the Day 1 profit or loss, as described below.

#### 3.3.1.3 Day 1 profit or loss

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Bank recognizes the difference between the transaction price and fair value in net trading income. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognized in profit or loss when the inputs become observable, or when the instrument is derecognized.

#### 3.3.1.4 Measurement categories of financial assets and liabilities

From 01 January 2018, the Bank classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortized cost, as explained in note 3.3.2.1
- FVOCI, as explained in notes 3.3.2.3 and 3.3.2.4
- FVPL

The Bank classifies and measures its trading portfolio at FVPL as explained in Notes 3.3.2.2. The Bank may designate financial instruments at FVPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies, as explained in Note 3.3.2.6.

Before 01 January 2018, the Bank classified its financial assets as loans and receivables (amortized cost), FVPL, available-for-sale or held-to-maturity (amortized cost), as explained in Notes 3.3.2.1, 3.3.2.7 and 3.3.2.7.

Financial liabilities, other than loan commitments and financial guarantees, are measured at amortized cost or at FVPL when they are held for trading and derivative instruments or the fair value designation is applied, as explained in Note 3.3.2.6.

#### 3.3.2 Financial assets and liabilities

## 3.3.2.1 Due from banks, Loans and advances to Customers, Financial investments at amortized cost

Before 01 January 2018, Due from bank and Loans and advances to customers, included non-derivative financial assets with fixed or determinable payments that were not quoted in an active market, other than those:

- That the Bank intended to sell immediately or in the near term
- That the Bank, upon initial recognition, designated as at FVPL or as available-forsale
- For which the Bank may not recover substantially all of its initial investment, other than because of credit deterioration, which were designated as available-for-sale.

From 01 January 2018, the Bank only measures Due from banks, Loans and advances to customers and other financial investments at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

62

The details of these conditions are outlined below:

#### Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel.
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- The expected frequency, value and timing of sales are also important aspects of the Bank's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

#### The SPPI test

Second step of its classification process the Bank assesses the contractual terms of financial to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgment and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than minimum exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

## 3.3.2.2 Financial assets or financial liabilities held for trading

The Bank classifies financial assets or financial liabilities as held for trading when they have been purchased or issued primarily for short-term profit making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there is evidence of a recent pattern of short-term profit taking. Held-for-trading assets and liabilities are recorded and measured in the statement of financial position at fair value. Changes in fair value are recognized in net trading income. Interest and dividend income or expense is recorded in net trading income according to the terms of the contract, or when the right to payment has been established.

Included in this classification are debt securities, equities, short positions and customer loans that have been acquired principally for the purpose of selling or repurchasing in the near term.

## 3.3.2.3 Debt instruments at FVOCI (Policy applicable from 01 January 2018)

The Bank applies the new category under IFRS 9 of debt instruments measured at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

These instruments largely comprise assets that had previously been classified as financial investments available- for-sale under IAS 39.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognized in OCI. Interest income and foreign exchange gains and losses are recognized in profit or loss in the same manner as for financial assets measured at amortized cost as explained in note. The ECL calculation for Debt instruments at FVOCI is explained in Note 2.6.3.Where the Bank holds more than one investment in the same security, they are deemed to be disposed of on a first—in first—out basis. On de recognition, cumulative gains or losses previously recognized in OCI are reclassified from OCI to profit or loss.

#### 3.3.2.4 Equity instruments at FVOCI (Policy applicable from 1 January 2018)

Upon initial recognition, the Bank occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of definition of Equity under IAS 32Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by- instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognized in profit or loss as other operating income when the right of the payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

#### 3.3.2.5 Debt issued and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortized cost. Amortized cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the effective interest rate (EIR). A compound financial instrument which contains both a liability and an equity component is separated at the issue date.

## 3.3.2.6 Financial assets and financial liabilities at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management only designates an instrument at FVPL upon initial recognition when one of the following criteria are met. Such designation is determined on an instrument-by-instrument basis:

The designation eliminates, or significantly reduces, the inconsistent treatment that
would otherwise arise from measuring the assets or liabilities or recognizing gains or
losses on them on a different basis; Or

- The liabilities (and assets until 01 January 2018 under IAS 39) are part of a group of financial liabilities (or financial assets, or both under IAS 39), which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; Or
- The liabilities (and assets until 01 January 2018 under IAS 39) containing one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by the contract, or it is clear with little or no analysis when a similar instrument is first considered that separation of the embedded derivative(s) is prohibited

Financial assets and financial liabilities at FVPL are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at FVPL due to changes in the Bank's own credit risk. Such changes in fair value are recorded in the Own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVPL is accrued in interest income or interest expense, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Interest earned on assets mandatorily required to be measured at FVPL is recorded using contractual interest rate as explained in Note 2.1.2. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other operating income when the right to the payment has been established.

## 3.3.2.7 Available-for-sale financial investments (Policy applicable before 01 January 2018)

Available-for-sale financial assets are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Available-for-sale financial assets (AFS) are non-derivatives that are either designated as AFS or are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss.

Available-for-sale financial assets and financial assets carried at fair value through profit or loss are subsequently carried at fair value. Gains and losses arising from changes in fair value of available-for-sale financial assets are recognized directly in other comprehensive income, until the financial asset is derecognized or impaired.

## 3.3.2.8 Held-to-maturity financial investments (Policy applicable before 01 January 2018)

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Bank's management has the positive intention and ability to hold to maturity. If the Bank were to sell other than an insignificant amount of held-to-maturity financial assets before its maturity, the entire category would be reclassified as available for sale.

Held-to-maturity investments are carried at amortized cost using the effective interest method, less any impairment losses.

#### 3.3.3 Reclassification of financial assets and liabilities

From 01 January 2018, the Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified. The Bank did not reclassify any of its financial assets or liabilities in 2017.

## 3.3.4 Impairment of financial assets (Policy applicable from 01 January 2018)

#### 3.3.4.1 Overview of the ECL principles

The adoption of IFRS 9 has fundamentally changed the Bank's loan loss impairment method by replacing IAS 39's incurred loss approach with a forward-looking ECL approach. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined in Note 3.3.4.2). The Bank's policies for determining if there has been a significant increase in credit risk are set out in Note 3.3.5.

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis depending on the nature of the underlying portfolio of financial instruments.

The Bank has established a policy to perform an assessment at the end of each reporting period of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. This is further explained in note 30.2.2

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

- Stage 1:When loans are first recognized, the Bank recognizes an allowance based on 12mECLs.Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- Stage 2:When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.
- Stage 3:Loans considered credit-impaired (as outlined in Note12.3.3.1). The bank records an allowance for the LTECLs.
- POCI: Purchased or originated credit impaired (POCI) assets are financial assets that
  are credit impaired on initial recognition. POCI assets are recorded at fair value at
  original recognition and interest income is subsequently recognized based on a creditadjusted EIR. ECLs are only recognized or released to the extent that there is a
  subsequent change in the expected credit losses.

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) de recognition of the financial asset.

#### 3.3.4.2 The calculation of ECLs

The Bank calculates ECLs based on a four probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- •PD The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously de recognized and is still in the portfolio. The concept of PDs is further explained in note 30.2.2.
- •EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The EAD is further explained in note 30.2.2.
- •LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD. The LGD is further explained in note 30.2.2.

When estimating the ECLs, the Bank considers three scenarios (a base case, an upside, downside ('average base')). When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

With the exception of credit cards and other revolving facilities, for which the treatment is separately set out in Note 2.6.5, the maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier.

The mechanics of the ECL method are summarized below:

• Stage 1: The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date.

These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR. This calculation is made for each of the four scenarios, as explained above.

- •Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- •Stage 3: For loans considered credit-impaired (as defined in note 30.2.2), the Bank recognizes the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.
- POCI assets are financial assets that are credit impaired on initial recognition.
   The Bank only recognizes the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the four scenarios, discounted by the credit- adjusted EIR.

#### Loan commitments and letters of credit

When estimating LTECLs for undrawn loan commitments, the Bank estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the three scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan. For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognized within provisions, as disclosed in note 16.2 to the financial statements.

#### Financial guarantee contracts

The Bank estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to financial guarantee contracts are recognized within provisions, as disclosed in note 16.2 to the financial statements.

## 3.3.4.3 Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortized cost is recognized in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognized in OCI is recycled to the profit and loss upon de recognition of the assets.

## 3.3.4.4 Credit cards and other revolving facilities

62

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities with one day's notice. The Bank does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Bank's expectations of the customer behavior, its likelihood of default and the Bank's future risk mitigation procedures, which could include reducing or cancelling the facilities. Based on past experience and the Bank's expectations, the period over which the Bank calculates ECLs for these products, is one year for corporate and 3 years for retail products.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, as explained in Note30.2.2 but greater emphasis is also given to qualitative factors such as changes in usage.

The interest rate used to discount the ECLs for credit cards is based on the average effective interest rate that is expected to be charged over the expected period of exposure to the facilities. This estimation takes into account that many facilities are repaid in full each month and are consequently charged no interest.

The calculation of ECLs, including the estimation of the expected period of exposure and discount rate is made, on an individual basis for corporate and on a collective basis for retail products. The collective assessments are made separately for portfolios of facilities with similar credit risk characteristics.

#### 3.3.4.5 Forward looking information

In its ECL models, the Bank relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Unemployment rates
- Consumer price indices

## 3.3.5 Impairment provision under local regulations

#### Loans and advances to customers

The outstanding principal of the advances are classified in accordance with the Asset Classification and Provisioning Regulation issued by DAB as follows:

- i) Standard: These are loans and advances, which are paying in a current manner or at most past due for the period of 1-30 days, fully secured and is supported by sound net worth, profitability, liquidity and cash flow of the obligor. Standard assets are sufficiently secured with respect to the repayment of both the principal amount and interest. An overdraft would be regarded as Standard if monthly interest payments and other charges are past due for 1-30 days, and there was regular activity on the account with no sign of a hard core of debt developing. A standard provision is maintained in the books of account @1% (31 December 2017: 1%) of value of such loans and advances.
- ii) Watch: These are loans and advances which are adequately protected, but are potentially weak. Such an asset constitutes an unwarranted credit risk, but not to the point of requiring a classification of Substandard. The credit risk may be minor, and most instances, bank management can correct the noted deficiencies with increased attention. Further, all loans and advances which are past due by 31 to 60 days for principal or interest payments are classified as Watch. A provision is maintained in the books of account not less than 5% of value of such loans and advances.
- iii) Substandard: These are loans and advances which show clear manifestations of credit weaknesses that jeopardize the liquidation of the debt. Substandard loans and advances include loans to borrowers whose cash flows are not sufficient to meet currently maturing debts, loans to borrowers which are significantly undercapitalized, and loans to borrowers lacking sufficient working capital to meet their operating needs.

Further, all loans and advances which are past due by 61 to 120 days for principal or interest payments are also classified as Substandard. A provision is maintained in the books of account not less than 25% of value of such loans and advances.

iv) Doubtful: These are loans and advances which display all the weaknesses inherent in loans and advances classified as Substandard but with the added characteristics that they are not well secured and the weaknesses make collection or liquidation in full, on the basis of currently available information, highly questionable and improbable. The possibility of loss is extremely high, but because of certain mitigating circumstances, which may work to the advantage and strengthening of the facility, its classification as an estimated loss is postponed until its more defined status is ascertained. Further all loans and advances which are past due by 121 to 480 days for principal or interest payments are also classified as Doubtful. A provision is maintained in the books of account not less than 50% of value of such loans and advances.

v) Loss: These are loans and advances which are considered uncollectible and of such little value that their continuation as recoverable facilities is not defensible. This classification does not imply that the facility has absolutely no recoverable value, but rather it is not practical or desirable to defer making full provisions for the facility even though partial recover in future may not be entirely ruled out. Loans and advances classified as Loss include those to bankrupt companies and insolvent firms with negative working capital and cash flow or those to judgment debtors with no means or foreclosable collateral to settle the debts. Further, all loans and advances which are past due over 481 days for principal and interest payments are classified as Loss. This category of loans shall be retained in bank balance sheet for the period of 6 month for recovery purposes and 100% loan loss provisioning should be made. After 6 months, they shall be immediately written off with the provisioning made.

The bank has also determine provision for expected credit losses under IFRS 9 which results higher than provision under Asset Classification Provisioning Regulation, accordingly higher provisions were in cooperated in the financial statements as disclosed in note 9.4 to the financial statements.

#### Investments, placements and other assets

The bank has policy of maintaining general provision on placements and investments based on the credit rating, falling in category A (0%), B (0.50%) and C (1%), entity also determine provision for expected credit losses under IFRS 9, the financial statements are in cooperated with higher provision impact resulting from the mentioned methods, as disclosed in notes 7.2.2 & 8.5.1 to the financial statements.

#### Off-balance sheet item

General provision of 1% is maintained on bank guarantees and letter of credits on unsecured portion by cash margin as required in Asset Classification and Provisioning Regulation issued by DAB, however, entity also determine provision for expected credit losses on off-balance sheet items under IFRS 9, the financial statements are in cooperated with higher provision impact resulting from the mentioned methods, as disclosed in note 16.2 to the financial statements.

## 3.3.6 Impairment of financial assets (Policy applicable before 01 January 2018)

#### Loans and advances

The policy for making provision against loan and advances was similar to one disclosed in note 3.3.5 above.

## a) Assets carried at amortized cost except for loans and advances to customers

The Bank assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is an objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the Bank uses to determine that there is objective evidence of an impairment loss include:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower (for example, equity ratio, net income percentage of sales);
- Breach of loan covenants or conditions
- Initiation of bankruptcy proceedings;

- Deterioration of the borrower's competitive position;
- Deterioration in the value of collateral; and
- Downgrading below investment grade level.

The amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the income statement.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as and improvement in the debtor's credit rating), the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of reversal is recognized in the statement of comprehensive income in impairment charge for credit losses.

## b) Assets classified as available for sale

The Bank assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered as an indicator that the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on those financial assets previously recognized in the statement of comprehensive income is removed from equity and recognized in the statement of comprehensive income. Impairment losses recognized in the statement of comprehensive income on equity instruments are not reversed through the statement of comprehensive income. If in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the statement of comprehensive income, the impairment loss is reversed through the statement of comprehensive income, related to an event occurring after the impairment loss was recognized.

#### 3.4 Financial liabilities

The Bank classifies its financial liabilities in following categories.

## a) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss are financial liabilities held for trading. A financial liability is classified in this category if incurred principally for the purpose of trading or payment in the short term. Derivatives (if any) are also categorized as held for trading unless they are designated as hedges

## b) Other financial liabilities measured at amortized cost

These are non-derivatives financial liabilities with fixed or determinable payments that are not quoted in an active market. These are recognized initially at fair value, net of transaction costs incurred and are subsequently stated at amortized cost; any differences between the proceeds (net of transaction costs) and the redemption value is recognized in the income statement.

## 3.5 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at the date. The fair value of a liability reflects its non-performance risk.

When available, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Bank uses valuation techniques that maximizes the use of relevant observable inputs and minimize the use of unobservable all of the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the Bank determines that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, that difference is recognized in profit and loss in an appropriate basis over the life of the instrument but no later than when valuation is wholly supported by observable market data or transaction is closed out.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Bank measures assets and long positions at a bid price and liabilities and short position at an ask price.

Portfolio of financial assets and financial liabilities that are exposed to market risk and credit risk that are managed by the Bank on the basis of the net exposure to either market risk or credit risk or measured on the basis of a price that would be received to sell a net long position (or paid to transfer a net short position) for a particular risk exposure. Those portfolio-level adjustments are allocated to the individual assets and liabilities on the basis of the relative risk adjustment of each of the individual instruments in the portfolio.

The Bank recognizes transfer between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

#### 3.6 Operating fixed assets

These are stated at historical cost less accumulated depreciation and impairment, if any, except for land and capital work in progress which is stated at cost less impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the asset.

Subsequent cost are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are recognized in statement of comprehensive income during the financial period in which they are incurred.

Depreciation is calculated using the straight-line method to allocate the depreciable amount of the assets over their estimated useful life as follows:

Building 20 years
Leasehold improvements 3 to 10 years
Computers 3 to 5 years
Office equipment 3 to 5 years
Furniture and fittings 3 to 10 years
ATMs 5 years
Vehicles 5 years

Depreciation is charged on additions during the year from the month they become available for their intended use while no depreciation is charged in the month of disposal of assets. The residual values, useful lives and depreciation method are reviewed and adjusted, if appropriate, at each statement of financial position date.

Gains and losses on disposal of property and equipment are determined by comparing proceeds with the carrying amount. These are included in other income in the statement of comprehensive income.

#### 3.7 Intangible assets

Intangible assets are capitalized only to the extent that the future economic benefits can be derived by the Bank having useful life of more than one year. Intangible assets are stated at cost less accumulated amortization. Amortization is charged to income applying the straight line method.

## i) Core deposits

The core deposits is capitalized resulting from the acquisition of deposit base of Standard Chartered Bank (SCB) Afghanistan operations during 2012 which is amortized over the useful life of 15 years.

#### ii) Computer software

Acquired computer software is capitalized on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortized over their estimated useful life of 3 to 10 years.

#### iii) License fee

Acquired trademarks and licenses are initially recognized at historical cost and subsequently recognized at cost less accumulated amortization. Amortization is calculated using the straight-line method to allocate the cost of the licenses over their estimated useful life.

The useful lives of intangibles are reviewed and adjusted, if appropriate, at each statement of financial position date.

#### 3.8 Impairment of non-financial assets

Non-financial assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment. Non-financial assets that are subject to depreciation/ amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss or reversal of impairment loss is recognized in the statement of comprehensive income. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date. Reversal of the impairment losses is restricted to the original cost of the assets.

#### 3.9 Taxation

#### Current

The current income tax charge is calculated in accordance with Income Tax Law, 2009. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

#### Deferred

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

#### 3.10 Revenue recognition

a) Interest income and expenses for all interest-bearing financial instruments, except for those classified as held for trading or designated at fair value through profit or loss, are recognized within 'interest income' and 'interest expense' in the statement of comprehensive income using the effective interest rate method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses.

- b) Due but unpaid interest income is accrued on overdue advances for periods up to 90 days in compliance with the Banking regulations issued by DAB. After 90 days, overdue advances are classified as non-performing and further accrual of unpaid interest income ceases.
- c) Gains and losses on disposal of property and equipment are recognized in the period in which disposal is made.
- d) Fees and commission income and expense are recognized on an accrual basis when the service has been provided/received.
- e) Fee and commission income that are integral part to the effective interest rate on financial assets and liability are included in the measurement of effective interest rate. Other fee and commission expenses related mainly to the transactions are services fee, which are expensed as the services are received.

## 3.11 Foreign currency transactions and translation

#### a) Functional and presentation currency

Items included in the financial statements of the Bank are measured using the currency of the primary economic environment in which the entity operates (the functional currency), which is Afghani (AFN). All amounts have been rounded to the nearest thousands, except when otherwise indicated

#### 3.12 Transactions and balances

Foreign currency transactions are translated into functional currency using the exchange rate prevailing at the date of the transaction. Foreign currency assets and liabilities are translated using the exchange rate at the balance sheet date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of assets and liabilities denominated in foreign currencies are recognized in income currently.

The exchange rate for following currencies against AFN were:

|                        | 1 USD | 1 Euro | 1 AED |
|------------------------|-------|--------|-------|
| As at 31 December 2018 | 75.31 | 86.01  | 20.47 |
| As at 31 December 2017 | 69.72 | 83.27  | 18.89 |

#### 3.13 Provisions

Provisions are recognized when there are present, legal or constructive obligations as a result of past events; it is probable that an out flow of resources embodying economic benefits will be required to settle the obligation; and a reliable estimate of the amounts can be made. Provision for guarantee claims and other off balance sheet obligations is recognized when intimated and reasonable certainty exists to settle the obligations.

## 3.14 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the financial statements when there is a legally enforceable right to offset the recognized amounts and the Bank intends to settle either on a net basis or realize the assets and settle the liabilities simultaneously.

#### 3.15 Dividend Distribution

Final dividend distributions to the bank's shareholders are recognized as a liability in the financial statements in the period in which the dividends are approved by the Bank's shareholders at the Annual General Meeting while interim dividend are recognized in the period in which the dividends are declared by the Board of Supervisors.

## 3.16 Earnings per share

The Bank presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss that is attributable to shareholders of the Bank by the weighted-average number of shares outstanding during the year.

#### 3.17 Employee benefits

## Defined contribution plan

Obligations for contributions to defined contribution plans are expensed as the related service is provided and recognized as personnel expenses (salaries and benefits) in profit or loss. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available.

#### Short-term benefits

62

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

## 4. Use of critical accounting estimates and judgments

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The resulting accounting estimates and judgments will, by definition, rarely equal the related actual results. The material estimates, assumptions and judgments used to measure and classify the carrying amounts of assets and liabilities are outlined below:

## a) Impairment losses on financial assets

The banks accounting framework considers both the provision prescribed under local regulations in Afghanistan and IFRS 9. Therefore, the Bank's level of provision for impairment against financial asset considers the requirements of both regimes.

The measurement of impairment losses both under IFRS 9 and IAS 39 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include:

- The Bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment:
- The Bank's internal credit grading model
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs to such models.
- Determination of associations between macroeconomic scenarios and, economic inputs, such as GDP growth
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models

It has been the Bank's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

The Bank reviews loans to customer balances quarterly for possible impairment and records the provision for possible loan losses as per the Bank's policy and in accordance with DAB regulations.

## b) Provision of income taxes

The Bank recognizes tax liability in accordance with the provisions of Income Tax Law 2009. The final tax liability is dependent on assessment by Ministry of Finance, Government of Islamic Republic of Afghanistan.

## c) Useful life of property and equipment and intangible assets

The Bank reviews the useful life, depreciation method and residual value of property and equipment and intangible assets at each statement of financial position date. Any change in estimates may affect the carrying amounts of the respective items of property and equipment and intangible assets with a corresponding effect on the depreciation / amortization charge.

These investments are managed by Julius Baer and Emirates NBD on behalf of the Bank.
- 8.2 These represent investments in Capital notes issued by DAB having maturity period from three to six months (31 December 2017: one year) carrying yield at rates ranging from 0.50% to 0.91% p.a. (31 December 2017: 0.40% to 4.2 p.a.) receivable on maturity of respective notes.
- 8.3 These represent investments in United States of America Treasury bills having maturity period ranging from one month to three months (31 December 2017: Nil), carrying yield at rates ranging from 2.29% to 2.39% p.a. (31 December 2017: Nil) recoverable on maturity.
- 8.4 These represent investments in sovereign bonds carrying coupon interest rates ranging from 1.25% to 7.75% (31 December 2017: 1.30% to 7.75%). These investments have maturity ranging from January 2019 to August 2025 (31 December 2017: January 2018 to October 2022). These investments are classified as "Debt Instrument at amortized cost" because of the Bank's ability and intention to hold these investments up to maturity. These investments are managed by Julius Baer, Credit Suisse and Emirates NBD on behalf of the Bank.

## 8.5 Impairment allowance for investments

8.5.1 The table below shows the credit quality and the maximum exposure to credit risk for categories based on the Bank's credit rating grades and year-end stage classification as at 31 December 2018 and 2017, respectively. The amounts presented are gross of impairment allowances. Details of the Bank's rating grades are explained in note 30.2.5.

- 9.1 These represent balances due from customers at various interest rates ranging from 7 % to 15% p.a. (31 December 2017: 10% to 15% p.a.) and are secured against mortgage of properties, personal guarantees, lien on equipment, pledge of stocks and/or assignment of receivables of the borrowers. The overdrafts are repayable on demand. These include loans and advances to Small Medium Size Enterprises (SME) loan amounting to AFN 138,845 thousands (31 December 2017: AFN 427,567 thousands) which are partially backed by Afghanistan Credit Guarantee Foundation (ACGF) guarantees to the extent defined in agreement with ACGF.
- 9.2 Term loans carry interest at various rates ranging from 11% to 18% p.a. (31 December 2017: 11% to 18% p.a.) and are secured against mortgage of properties, personal guarantees, lien on equipment, pledge of stocks and/or assignment of receivables of the borrowers. These include loans and advances to customers amounting to AFN 587,070 thousands (31 December 2017: AFN 125,738 thousands) which are partially backed by DEG guarantee to the extent defined in the agreement with DEG.

- 9.2.1 Term loans include Small Business loans amounting to AFN 46,646 thousands (31 December 2017: AFN 32,819 thousands) carrying interest rate ranging from 13% to 18% p.a. (31 December 2017: 13% to 18% p.a.). These loans are secured against deposit of original title deed, corporate guarantee by a registered company and hypothecation of movable fixed assets as collateral after registration from DAB.
- 9.3 These represent consumer loans due from individual payroll account holders and employees of corporate customers having payroll account with the Bank carrying interest rate ranging from 15% to 22% (31 December 2017: 15% to 22%) and credit card loans carrying interest up to 36% (31 December 2017: 36%) on annual basis on outstanding balances.
- 9.4 This represent additional general provision maintained by the bank which is duly approved by DAB.

## 9.5 Allowance for ECL / Impairment allowance for loans and advances to customers

9.5.1 The table below shows the credit quality and the maximum exposure to credit risk for categories based on the Bank's credit rating grades and year-end stage classification as at 31 December 2018 and 2017, respectively. The amounts presented are gross of impairment allowances. Details of the Bank's rating grades are explained in note 30.2.5.

| Provision held for expected credit losses - note 9.5.3 | 26,011                             | 33,945                             | 8,952                              | 68,908    | 85,629              |
| Net balance  | 2,516,515                          | 529,744                            | 1,977                              | 3,048,236 | 3,369,970           |

9.5.2 The Bank has filed suits for the recovery of loans and advances (principal due) against the defaulted borrowers amounting to AFN 754,965 thousands (31 December 2017: AFN 683,168 thousands) as at the year end. These suits are pending decisions at various courts. The Bank's management is of the view that the aforementioned suits will be decided in its favor due to sound legal footings.

9.5.3 IFRS 9 expected credit loss amounts to AFN 68,908 thousands as at 31 December 2018. The provision of AFN 63,867 thousands (General provision: AFN 28,668 and Specific provision: AFN 35,199 thousands) (31 December 2017: The provision of AFN 85,629 (General provision: AFN 52,521 and Specific provision: AFN 33108) made under Assets Classification and Provisioning Regulation is lower than IFRS 9 ECL, therefore, the Bank has maintained the higher provision under the requirements of IFRS 9.

## 10. Receivable from financial institutions

This represents non-interest bearing receivable balance due from CSC Bank SAL (CSC). The Bank has entered into an agreement with CSC whereby credit card/debit card holders of various financial institutions can use ATM machines of the Bank and the amount withdrawn including bank charges will be paid by CSC to the Bank.

#### 14.1 Receivable from DoJ

62

This represents receivables from the United States Government department, Department of Justice (the "DoJ"). The DoJ seized an amount of AFN 565,701,000 (equivalent to USD 10,100,000) from the Bank's account with Standard Chartered's branch in New York. Pursuant to Title 18, U.S. Code Section 981(k), the United States sought to reach the customer's Afghan-based accounts by seizing funds from the Bank's correspondent account in the United States. The United States has not alleged any wrongdoing against the Bank. In September 2013, the United States returned to the Bank approximately US\$ 5.7 million, plus accrued interest, of the seized funds. The United States then moved to strike AIB's claim as to the remaining monies. In September 2015, that motion was denied as to all but USD 147,939, leaving approximately USD 4.1 million at issue. AIB has had some discussions with the U.S. government regarding settlement of the funds, but the U.S. government has advised that it is unable to engage in further discussions given the pendency of customer's competing claim to the same money. The U.S. government has moved to strike customer's claim, and, if the motion is granted, the Bank intends to pursue settlement discussions with the U.S. government. However, on prudent basis, the Bank has made provision of AFN 250,605 thousands in its books of account.

14.2 This represents provision for expected credit losses on advances to staff (31 December 2017: 1% on other assets is maintained as per Asset Classification and Provisioning Regulation issued by DAB). Classification and Provisioning Regulations issued by DAB.

- 16.1 This represents amounts received on behalf of the customers, however, not credited in the respective customer accounts due to incomplete identification data.
- 16.2 This represents 1% provision on unsecured portion by cash margin of bank guarantees as required in Asset Classification and Provisioning Regulation issued by DAB, however, IFRS 9 provision for expected credit loss computed on unfunded financing facilities amounts to AFN 23,363 as at 31 December 2018. The provision under regulations issued by DAB is higher than IFRS 9 ECL therefore, the Bank has maintained the regulatory provision.

31 December 31 December

- 17.1 Pursuant to letter no.918/703 dated 17 May 2010 issued by Da Afghanistan Bank (DAB), the Bank complies with the minimum paid-up capital requirement for commercial banks in Afghanistan amounting to AFN 1,000,000 thousands (equivalent to US \$ 20,000 thousands).
- 17.2 Issued, subscribed and paid up capital comprises 46.25% holding by Horizon Associates LLC and 46.25% holding by Wilton Holding Limited, 7.5% by International Finance Corporation. (31 December 2017: 46.25% holding by Horizon Associates LLC and 46.25% holding by Wilton Holding Limited and 7.5% by International Finance Corporation).
- 17.3 During the year, the Bank has paid cash dividend of AFN 21.5 per share (31 December 2017: AFN 13.55 per share) amounting to AFN 645 million (31 December 2017: AFN 406.5 million).

## 18. Capital reserves

'Article 93 "Reserve Capital" of Corporations and Limited Liability Companies Law of Afghanistan, requires that Bank should transfer 5% of its profit to Capital Reserve to compensate for future possible losses to the extent such capital reserves reach upto 25% of the Bank's capital. The Bank's capital reserves as at 31 December 2018 stood at AFN 260,405 thousands (31 December 2017: AFN 236,497 thousands).

## 31.2 Financial risk factors

The Bank's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business and the operational risks are an inevitable consequence of being in business. The Bank's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on the Bank's financial performance.

The Bank's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up to date information systems. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management is carried out by a Risk Management Department (RMD) under policies approved by the Management Board. RMD identifies, evaluates and manages financial risks in close cooperation with the Bank's operating units. The Management Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and use of non-derivative financial instruments. The internal audit is responsible for the independent review of risk management and control environment. The most important types of risk are credit risk, liquidity risk, market risk and other operational risk. Market risk includes currency risk, interest rate and other price risk.

### 31.2.1 Credit Risk

The Bank takes on exposure to credit risk, which is the risk that a counterparty will cause a financial loss for the Bank by failing to discharge an obligation. Credit risk is the most important risk for the Bank's business; management therefore carefully manages its exposure to credit risk. Credit exposures arise principally in lending activities that lead to loans and advances, balances with banks and receivable from financial institution and placements with other banks. Credit risk also arises in off-balance sheet financial instruments, such as Bank's contingencies and commitments. The credit risk management and control are centralized in credit risk management team of Bank and reported to the management team and head of each business unit regularly. Balances with DAB are not exposed to credit risk.

## 31.2.2 Credit risk measurement

## Impairment assessment under IFRS 9 (Policy applicable from 01 January 2018)

## Definition of default and cure

The Bank considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments. As a part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate.

It is the Bank's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when none of the default criteria have been present for at least 3 consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the updated credit grade, at the time of the cure, and whether this indicates there has been a significant increase in credit risk compared to initial recognition. The bank is observing a probationary period of a minimum of 3 instalments (for repayments which are on a quarterly basis or shorter) and 12 months (in cases where instalments are on a longer frequency than quarterly) after the restructuring, before upgrading from Stage 3 to 2.

## Credit ratings and PD estimation process

The Bank's Credit Risk Department operates its internal rating models. The models incorporate both qualitative and quantitative information and, in addition to information specific to the borrower, utilize supplemental external information that could affect the borrower's behavior. PDs for rated portfolios are determined using migration of rating grades from one period to other within the PD observation period. Consumer lending comprises unsecured personal loans, credit cards and overdrafts. PDs models of these products are primarily driven by days past due.

Estimated historical realized default rates are adjusted for IFRS 9 ECL calculations to incorporate forward looking information and the IFRS 9 Stage classification of the exposure. This is repeated for each economic scenarios as appropriate. For debt securities in the Treasury portfolio, external rating agency credit grades are used. The PDs associated with each grade are determined based on realized default rates as published by the rating agency.

## Exposure at default

The exposure at default (EAD) represents the gross carrying amount of the financial instruments subject to the impairment calculation, addressing both the client's ability to increase its exposure while approaching default and potential early repayments too.

The EADs are determined based on the expected payment profile, which varies by product type. For amortizing products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over the 12 months and lifetime basis. This is also adjusted for any overpayments made by the borrower. For revolving products, the EAD is predicted by taking current drawn balance and adding a credit conversion factor which allows for the expected drawdown of the remaining limit by the time of default.

To calculate the EAD for a Stage 1 loan, the Bank assesses the possible default events within 12 months for the calculation of the 12mECL. For Stage 2, Stage 3 and POCI financial assets, the exposure at default is considered for events over the lifetime of the instruments.

### Loss given default

EZ

Bank calculates LGD rates and these LGD rates take into account the EAD for historical pool of non-performing loans in comparison to the amount recovered or realized against such loans. In calculation of LGDs, the Bank considers all eligible collateral provided the collateral can be legally enforced. Due to the complexities involved in the Afghanistan regarding collateral realization and lack of historical experience to demonstrate recoveries through realization of collaterals, the Bank restricts the expected recoveries (to be considered in LGD computations) based on its historical recovery experiences.

## Significant increase in credit risk

The Bank continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Bank assesses whether there has been a significant increase in credit risk since initial recognition. The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition. Significant increase in credit risk is measured by comparing the risk of default estimated at origination with the risk of default at reporting date. The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer/facility to the watch list, or the account becoming forborne. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition.

## Measuring expected credit losses - ECL

PD, EAD and LGD are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in earlier year) on annual basis. This effectively calculates an ECL for each future year, which is then discounted back to the reporting date and summed. The discount rate used in ECL computation is the original effective interest rate or an approximation thereof.

Forward looking economic information is also included in determining the 12 month and lifetime ECL. The bank has performed historical analysis and identified key economic variables impacting credit risk and ECL for each portfolio. These economic variables and their associated impact on PD, EAD and LGD vary by financial instrument. Expert judgment has also been applied in this process. Forecast of these economic variables (the "base economic scenario") are obtained from external sources on a quarterly basis.

In addition to the base economic scenario, the management also estimate other possible scenarios along with scenarios weighting. The scenario weighting are determined by an expert credit judgment. As with any economic forecasts, the projections and likelihoods of the occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The bank considers these estimates of the possible outcomes. The bank has used base, upside and downside scenarios for its ECL estimation.

## Impairment under local regulations

- (i) Overdue balances on loans to customers are segmented into four categories as described in note 4.4(b). The percentage of provision created on such overdue balances are as per guidelines issued by DAB and reflects the range of default probabilities defined for each category. This means that, in principle, exposures migrate between classes as the assessment of their probability of default changes.
- (ii) Exposure at default is based on the amounts, the Bank expects to be owed at the time of default. For example, for a loan this is the face value. For a commitment, the Bank includes any amount already drawn plus the further amount that may have been drawn by the time of default, should it occur.
- (iii) Loss given default or loss severity represents the Bank's expectation of the extent of loss on a claim should default occur. It is expressed as percentage loss per unit of exposure and typically varies by type of counterparty, type and seniority of claim and availability of collateral or other credit mitigation.

## (a) Other than loans and advances

Other than loans and advances includes balances with other banks and financial institutions and placements with other banks, investments in bonds and held with DAB and other assets. Judgments and instructions from the Bank's treasury are being used by the Bank's management in placing funds with other banks and are viewed as a way to gain better credit quality mapping and maintain a readily available source to meet the funding requirements at the same time when required.

Further, the Bank has banking relationships with financial institutions which have good international reputation and strong financial standing and therefore, probability of default by such financial institutions is low.

6-2

## 31.2.3 Risk limit control and mitigation policies

The Bank manages, limits and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and groups, industries and countries.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary. Limits on the level of credit risk by product and industry sector are approved quarterly by the Management Board.

The exposure to any one borrower is further restricted by sub-limits covering on- and off-balance sheet exposures. Actual exposures against limits are monitored daily.

Exposure to credit risk is also managed through analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations at the time of loan appraisal for initial and subsequent loans.

Some other specific control and mitigation measures are outlined below.

## (a) Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advances, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties
- · Charges over business assets such as premises, inventory and accounts receivable

In addition, in order to minimize the credit loss, the Bank will seek additional collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances

## (b) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Bank on behalf of a customer authorizing a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions – are collateralized by the underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

Commitments to extend credit represent unused portions of authorizations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

## 31.2.4 Analysis of maximum exposure to credit risk and collateral and other credit enhancements

|  | Maximum exposure  |   |  |
|--|---|---|--|
|  | 31 December<br>2018   | 31 December<br>2017   |  |
| Credit risk exposures relating to on-balance sheet items are as follows:   | AFN '000  | AFN '000  |  |
| Balances with other banks Placements – net Investments - net (excluding capital notes with DAB) Loans and advances to customers - net Receivables from other financial institutions Other assets | 10,095,978<br>19,858,325<br>17,278,765<br>2,897,617<br>360,120<br>419,631<br>50,910,436 | 10,174,148<br>13,439,256<br>12,433,030<br>3,369,970<br>587,534<br>447,844<br>37,081,812 |  |
| Credit risk exposures relating to off-balance sheet items are as follows:  |   |   |  |
| Guarantees Undrawn loan and overdraft facilities Commercial letters of credit  | 8,258,845<br>1,217,553<br>25,333<br>9,501,731   | 6,463,038<br>1,265,872<br>134,575<br>7,863,485  |  |

The above table represents credit risk exposure to the Bank at 31 December 2018 and 31 December 2017, taking account of any collateral held or other enhancements attached. For on-balance-sheet assets the exposure set out above is based on net carrying amounts as reported in the statement of financial position.

The percentage of the maximum credit exposure in balances with other banks, placements, investments and loans and advances are as follows (in percentage of the total credit exposure):

|  | 31 December<br>2018 | 31 December<br>2017 |
|--|---------------------|---------------------|
| Balances with other banks                            | 19.83%              | 25.15%              |
| Placements – net                                     | 39.00%              | 33.22%              |
| Investments - net (excluding capital notes with DAB) | 33.94%              | 30.74%              |
| Loans and advances to customers - net                | 5.69%               | 8.33%               |

## 31.2.5 Credit quality of financial assets

The credit qualities of Bank's financial assets have been assessed below by the reference to external credit ratings of counter parties determined by various international credit rating agencies. The counterparties for which external credit ratings were not available, and have been assessed by reference to internal credit ratings determined based on their historical information for any defaults in meeting obligations.

| Balances with other banks / Fls               | Credit<br>rating | Credit<br>rating<br>agency | 31<br>December<br>2018<br>AFN '000 | 31<br>December<br>2017<br>AFN '000 |

| (b) Loans and advances past due but not impair                   | ed                    |                          |                         |                                 |                       |
| 31 December 2018 Past due up to 30 days Fair value of collateral | 93,030<br>140,023     | 143,199<br>240,234       | -                       | :                               | 236,229<br>380,257    |
| 31 December 2017 Past due up to 30 days Fair value of collateral | :                     | Ī                        |                         | :                               | -                     |

Upon initial recognition of loans and advances, the fair value of collateral is based on valuation techniques commonly used for the corresponding assets. In subsequent periods, the fair value is updated by reference to market price or indexes of similar assets.

## (c) Loans and advances individually impaired

The individually impaired loans and advances to customers before taking into consideration the cash flows from collateral held is AFN 10,839 thousands, under IFRS 9 (31 December 2017: AFN 144,891 thousands, under ACPR).

## (d) Loans and advances restructured / rescheduled

Restructuring activities include extended payment arrangements and deferral of payments. Restructuring policies and practices are based on indicators or criteria which, in the judgment of management, indicate that payment will most likely continue. These policies are kept under continuous review. Renegotiated loans that would otherwise be past due or impaired at 31 December 2018 were AFN 105,541 (31 December 2017: Nil).

## 31.3 Market risk

The Bank takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads and foreign exchange.

# 31.3.1 Foreign exchange risk

The Management committee sets limits on the level of exposure by currency and in aggregate for both overnight and intra-day positions, which are monitored daily. The table below summarizes the Bank's exposure to foreign currency exchange rate risk at 31 December 2018 and 31 December The Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. 2017. Included in the table are the Bank's financial instruments at carrying amounts, categorized by currency.

If the functional currency, at the year-end date, strengthens/weakens by 10% against the USD with all other variables held constant, the impact on profit or loss for the period would be AFN 280 thousands higher/lower (31 December 2017: AFN 136,854 thousands higher / lower) respectively mainly as a result of exchange gains/losses on translation of foreign exchange denominated receivables and payables. If the functional currency, at the year-end date, strengthens / weakens by 10% against the EURO with all other variables held constant, the impact on profit or loss for the period would be AFN 35 thousands lower/higher (31 December 2017: AFN 13,237 thousands lower / higher) respectively mainly as a result of exchange gains/losses on translation of foreign exchange denominated receivables and payables. If the functional currency, at the year-end date, strengthens/weakens by 10% against the AED with all other variables held constant, the impact on profit or loss for the period would be AFN 5,667 thousands higher/lower (2017: AFN 4,443 thousands higher/lower) respectively mainly as a result of exchange gains/losses on translation of foreign exchange denominated receivables and payables.

profit or loss for the period would be AFN (707) thousands higher/lower (2017. AFN 572 thousands higher/lower) respectively mainly as a result of If the functional currency, at the year-end date, strengthens/weakens by 10% against the GBP with all other variables held constant, the impact on exchange gains/losses on translation of foreign exchange denominated receivables and payables.

profit or loss for the period would be AFN 106 thousands higher/lower (2017: AFN 166 thousands higher/lower) respectively mainly as a result of If the functional currency, at the year-end date, strengthens/weakens by 10% against the INR with all other variables held constant, the impact on exchange gains/losses on translation of foreign exchange denominated receivables and payables.

## 31.3.2 Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Bank Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Bank takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movements arise. Bank's investments, loans and advances are primarily linked to EONIA, LIBOR and US Prime.

The table below summarizes the Bank's exposure to interest rate risks. It includes the Bank's financial instruments at carrying amount, categorized by the earlier of contractual reprising or maturity dates.

If the interest increase / (decrease) by 100 bps, the impact on profit or loss for the year would have been AFN 448,859 thousands (31 December 2017: AFN 404,264 thousands) lower / higher respectively.

## 31.4 Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfill commitments to lend.

## 31.4.1 Liquidity risk management process

The Bank's liquidity management process, includes:

- Day-to-day funding, managed by monitoring future cash flows to ensure that requirements can be met. This includes replenishment of funds as they mature or are borrowed by customers;
- Maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;
- Monitoring balance sheet liquidity ratios against internal and regulatory requirements; and
- Managing the concentration and profile of debt maturities.

Monitoring and reporting take the form of cash flow measurement and projections for the next day, week and month respectively, as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

Bank Treasury also monitors unmatched medium-term assets, the level and type of undrawn lending commitments, the usage of overdraft facilities and the impact of contingent liabilities such as standby letters of credit and guarantees.

## 31.4.2 Funding approach

Sources of liquidity are regularly reviewed by the Asset Liability Committee (ALCO) to maintain a wide diversification by currency, geography, provider, product and term.

Liquidity Ratios Advance to deposit ratios

## 31.4.3 Non-derivative financial liabilities and assets held for managing liquidity risk

The table below presents the cash flows payable by the Bank under non-derivative financial liabilities and assets held to manage liquidity risk by remaining contractual maturities at the date of the statement of financial position. The amounts disclosed in the table are the contractual undiscounted cash flows, whereas the Bank manages the inherent liquidity risk based on expected undiscounted cash inflows.

## 31.5 Fair value of financial assets and financial liabilities

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfill commitments to lend.

## (a) Financial instruments measured at fair value using a valuation technique

The table below analyses financial instruments carried at fair value, by valuation method. The various fair value levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

|  | Level 1<br>AFN '000 | Level 2<br>AFN '000 | Level 3<br>AFN '000 |
|--|---------------------|---------------------|---------------------|
| Debt investments at fair value through OCI | -                   | 3,588,690           | _                   |
| As at 31 December 2018                     |                     | 3,588,690           | -                   |
| As at 31 December 2017                     |                     | 4,586,137           | _                   |

Valuation technique and key inputs used for investments in bonds were quoted market bid price in active market.

There were no transfers made among various levels of fair value hierarchy during the year.

## (b) Financial instruments not measured at fair value

The table below summarizes the carrying amounts and fair values of those financial assets and liabilities which are presented on the Bank's statement of financial position at value other than fair value.

|   | Carrying Value      |                       | Fair Value          |                     |

The carrying values of these financial assets and liabilities approximates their fair values as at the date of statement of financial position.

## (i) Investments:

OZ\_

These include investment bonds classified as held-to-maturity which are measured at amortized cost. The fair value of these investments is equal to the carrying amount.

## (ii) Loans and advances, other assets and other financial liabilities

Fair value of loans and advances, security deposits and other receivables and all the financial liabilities cannot be calculated with sufficient reliability due to absence of current and active market for such assets and reliable data regarding market rates for similar instruments, so its carrying amount is its fair value. The provision for loans and advances has been calculated in accordance with the Bank's policy and regulations issued by DAB.

## (iii) Off-balance sheet financial instruments

The fair value of the off-balance sheet financial instruments is equal to the carrying amounts.

- 31.6 The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of balance sheets, are:
  - (i) to comply with the capital requirements set by the DAB;
  - (ii) to safeguard the Bank's ability to continue as a going concern so that it can continue to be self-sustainable; and
  - (iii) to maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored regularly by the Bank's management. DAB requires each bank to maintain its Tier 1 Capital ratio and Regulatory Capital ratio to be at least 6% and 12% respectively. The Bank is maintaining this ratio well above the required level. The table below summarizes the composition of the regulatory capital and ratio of the Bank:

|  | 31 December<br>2018<br>AFN '000 | 31 December<br>2017<br>AFN '000 |
|--|---------------------------------|---------------------------------|

## 32. Islamic banking

The Bank started Islamic banking operations in November 2015 with the following Islamic deposit products.

## **Qardul Hasana Current Account**

This account is profit-free account specifically designed to meet the requirements of the Bank's customers. Account holders will have easy access to their account at any time to meet their personal or business expenses.

## **Mudarabah Savings Account**

This account is designed specifically to meet the requirements of customers who authorize the Bank to invest their cash deposits. Customers can deposit or withdraw money at any time they wish, and can earn profits on their savings.

## Mudarabah Term Investment Deposit

These funds are accepted with different investment periods. The Bank manages and invests the funds aiming at realizing the best profit for the mutual interest of the parties.

## Below are the figures relating to Islamic banking as at 31 December 2018

|   | 31 December<br>2018<br>AFN '000 | 31 December<br>2017<br>AFN '000 |
|---|---------------------------------|---------------------------------|
